SWARNALI GUHA

Lead Full Stack • React and .NET • Email: *swguha@gmail.com* **Phone:** (+91) 89614 98920
LinkedIn: http://linkedin.com/in/swarnali-guha-profile **GitHub:** https://github.com/swguha/

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **11+ years** of experience architecting and delivering scalable, enterprise-grade web applications. Expert in **.NET Core, C#, ASP.NET MVC, ReactJS, Redux, TypeScript, and modern JavaScript (ES6+)**. Strong frontend leadership experience in architecting React applications, defining reusable component libraries, establishing scalable folder structures, optimizing rendering performance, and implementing efficient state management strategies for large-scale SPAs.

Actively led the end-to-end SDLC — from solution design and API architecture to UI implementation and performance tuning along with technical decision-making while mentoring teams. Extensive experience building secure RESTful APIs and microservices using .NET Core, ensuring seamless integration with modern frontend ecosystems. Advocate of clean architecture**, SOLID principles**, code quality standards, and testable design patterns.

Azure-certified (AZ-900, AZ-204) with practical experience building and deploying cloud-native, containerized applications using Azure services and automated **CI/CD pipelines** using **GitHub Actions** to enable automated builds, secure deployments, and scalable cloud infrastructure.

International onsite experience in Toronto, Canada collaborating with global stakeholders to deliver high-impact enterprise solutions in Agile environments.

CORE TECHNICAL COMPETENCIES

- **Backend** : ASP.NET Core, C#, MVC, REST API, Web API , EF Core
- **Frontend** : ReactJS, Redux, JavaScript (ES6+), Typescript, GraphQL, HTML , Tailwind CSS
- **Containerization** (Docker) • DevOps & CI/CD (GitHub Actions)
- **Databases**: PostgreSQL, MySQL
- **Unit Test Framework** : Jest, NUnit
- **Tools** : Postman, JIRA, GitHub, Fiddler, Visual Studio, SOAP
- **Cloud (Azure)** : Resource groups, Azure SQL DB, Azure Blob Storage, Azure Key Vault, Azure Container Registry, Azure Container App, Azure App Service
- **AI Tools/Agents** : Microsoft Co-Pilot, Cursor, Gemini, Figma Make, Claude Opus 4.5, GPT 5
- **Soft Skills** : Stakeholder Management, Agile/Scrum, and Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

IBM, IN - Technical Specialist / Senior Software Developer —(May 2018 – Present)

Client: Bell Canada (Telecom Domain) • Onsite Assignment: Toronto, Canada (Oct 2022 - Oct 2023)

- Architected and led end-to-end development of enterprise-scale telecom ordering platforms using ReactJS and .NET Core, supporting **10k+ daily active users**, reducing manual processing time by **35% through workflow automation.**
- Engineered scalable frontend architecture by establishing reusable component libraries and advanced state management (Redux/Context) resulting **30% reduction in frontend development** time for subsequent

project modules.

- Optimized web performance by **lazy loading, memoization** techniques minimizing re renders and improving responsiveness. Implemented **custom hooks** to abstract API calls reducing code duplication.
- Designed and implemented secure **RESTful APIs** and microservices using .NET Core and **C#**, incorporating authentication and authorization mechanisms and enforcing clean architecture principles.
- Modernized legacy **.NET MVC applications to .NET Core Microservices**, improving system scalability, and aiming to accelerate the delivery **lifecycle by 20%** .
- Engineered high-performance, thread-safe .NET Core backend services leveraging **Task-based asynchronous programming (async/await)** and **Dependency Injection**, integrated with middleware-based request/response interception, robust logging, and structured exception handling to optimize **concurrent request handling** and service lifetime management.
- Implemented robust asynchronous data handling in React using **Axios, async/await**, and Promise-based workflows, with centralized error handling, request interceptors, and token-based authentication integration.
- Integrated **GraphQL queries** and mutations to solve over-fetching issues **reducing payload size around 20%** and significantly improving mobile user experience with low bandwidth.
- Developed a .NET Core POC leveraging **Entity Framework Core** (Code-First) with migrations, repository pattern, and asynchronous CRUD operations to evaluate performance and maintainability of data access layers.
- Built automated **CI/CD workflows** using **GitHub Actions**, enabling **Docker**-based containerization, Azure Container Registry integration, and seamless deployment to Azure App Services and Container Apps.

Wipro, IN - Software Engineer (Dec 2017 – Apr 2018)

- Developed SSRS reports using SQL Server & Business Intelligence Studio, enhancing data visualization.
- Optimized SQL queries and improved reporting performance.
- Built web-based dashboards and reporting tools, enabling real-time data insights for business users.

Accenture, IN - Software Developer (Nov 2014 – Dec 2017)

- Developed enterprise web applications using ASP.NET MVC, C#, SQL Server, and JavaScript.
- Designed RESTful APIs and optimized backend queries using LINQ.
- Built responsive UI components and collaborated with UX teams to deliver scalable solutions.
- Wrote and optimized complex SQL queries, stored procedures, and triggers.

CERTIFICATION

- Microsoft Azure Fundamentals **AZ-900**
- Microsoft Azure Developer Associate **AZ-204**

ACHIEVEMENTS

- Client appreciation NPS 10/10 by BELL Canada Aug 2023
- Manager's choice award by IBM Nov 2018, May 2019
- Appreciation with BluePoints by IBM Mar 2024, Jan 2022, Aug 2021
- Star of the Quarter by Accenture Mar 2015

EDUCATION

B.TECH - West Bengal University of Technology - Electronics & Communication Engineering - **GPA: 8.2**
